Aptitude test practice pdf

Free Abstract Aptitude Tests Free Logical Aptitude Tests Free Verbal aptitude tests - type 1 & type 2 Free numerical aptitude tests - type 1 & type 2 Free mechanical aptitude tests Note: Free aptitude tests you find on the internet are not tailored to the specific job you have applied for, but your real samples will be. To best prepare for your aptitude tests, take our job-tailored preparation packages. Our Australian psychometric testing experts have developed comprehensive packages to help you prepare for your aptitude tests. Aptitude tests or cognitive tests include the following tests: abstract aptitude tests, logical aptitude tests, conceptual reasoning tests, verbal aptitude tests, numerical aptitude tests and mechanical aptitude tests. Please note that we also have preparation packages for your personality test, work safety tests and emotional intelligence tests as part of our personality test preparations. All of our packages are designed by Australian psychometrics and aptitude test developers to ensure they match the aptitude tests you will receive. To help you become familiar with standard aptitude tests and assess how well you are likely to get fit, we have designed a number of short online aptitude tests that you can practice for free. To take our free tests, you need to scroll to the bottom of the page. Our success stories on aptitude test preparation: It was so good to do my aptitude tests with NAB after taking your preparation. It made it so much easier. Nikki (applied for a promotion with NAB) ----- just wanted to pass on my thanks to you. You were a great help in preparing me for my ability psyche test with The Rail Car Driver in Perth. I have passed and I am now in the pool waiting impatiently for a training date. All the tests I did were a big help too. Thank you very much, especially to Daniel! Glenn (applied for a position with PTA) ----- I bought the ACER book for Vic Police, but it didn't help me. Your site was great as I could learn what I did wrong and how to answer aptitude test questions correctly. Without your help I would have failed the ACER test again. Daniel (applied for a position with Victoria Police) ----- In preparation for an aptitude assessment I sat this past Sunday as I received news I had been successful in moving on to the QFES final stage of the recruitment process, (which is fantastic) I am very grateful for your services you provide. A (applied for a position with QFES) ----- The guidance I received from you on the aptitude test was exactly what I needed. I highly recommend. David (applied for a role with Fire and Rescue NSW) I recently had a one-on-one coaching session with one of your senior psychometric psychometric Trainer. My time with coach was worth every penny. He shared really clever strategies to prepare for aptitude tests and helped me through some of the reasoning problems. I highly recommend this service and especially face-to-face coaching Dustin (applied for a senior role with Bank of America) ----- G'day! I wanted to give you some feedback on fitness practice tests. What an amazing preparation, I don't regret buying it for a second. Thanks to your courses and tests I scored very highly on the aptitude test and qualified for every single ADF officer position, including the one I was aiming for (Air Force Pilot). I even told the recruitment officer about it and she said she would share it with other candidates! No hesitation from me to recommend this to other people. 10/10. JJ (applied for a role with ADF) ----- Free Abstract aptitude test. Free logical reasoning test. Free inductive reasoning test. Free Hudson abstract reasoning test. Free practice aptitude test examples – Our free abstract reasoning tests are designed to help you understand and practice the types of questions used in the real test you will sit for your potential employer. Unlike testing questions tailored to the difficulty and complexity required for a particular job, our free abstract test questions are targeted at a general job. Once you have completed each test, you will immediately receive a full test report that includes your total score, a list of correct and incorrect test responses, and detailed explanations of the correct answers to each question. Our abstract aptitude tests are job specific, with a pool of more than 600 questions for each job category, including detailed answers for all test questions. These are designed to ensure that you are fully equipped to complete your real abstract, logical or conceptual reasoning tests. To take our free abstract or logical aptitude tests, you need to scroll to the bottom of the page. Free example of an abstract or inductive abilities test question: What is the next form? To answer this abstract or inductive reasoning test question, we need to first identify the patterns and logical rules that are relevant to the group of characters in the test question. In this series, there are two logical rules that move from left to right. The first is that all the inner shapes move somewhere counterclockwise at each step. The second rule is that at each step the triangle alternates with a black square. At step five, there is a triangle at the top – therefore, at the next step, it will move counterclockwise into the left place and become a black square. Another free example aptitude test - abstract reasoning test question, is one used by companies like Hudson, and we you to do it. In this free example aptitude test you need to find what specific buttons do for a group group For example, you can figure in the question bar based on multiple sample lines in the Base Screen box. Once you find what the buttons do yours then can find what the correct final figure is in the question line. Let's examine the following abstract test example: In this abstract test question, find out which buttons 1, 3, and 5 do. From the first line, we can see that the original shape (the three shapes on the left) goes through two transformations to form the shape on the right: (i) a change in the shapes (square to circle or circle to square); and (ii) a change in colors (black to white or vice versa). Two buttons are active on this line (1 and 2); But we still don't know which one changes the shape or which one changes the color. The second line also shows a shape that swaps the color of its three shapes, but there is no change in these shapes. This time, button 2, 3, and 4 are 'active' – so button 2 (the only common 'active' button with line 1) must be the one that swaps colors; and we can now infer that it is barely 1 that changes (or changes) the shapes. The buttons 3 and 4 must therefore be the ones that change the horizontal and vertical lines, so we will have to refer to the third line to find out their individual functions. In line three, because button 1 and 2 are 'inactive', we know that there will be no transformation of color or shape. Button 4 and 5 are 'active' and we can see that the right number has been made smaller and a vertical line removed. Line 3 shares only one active button with line 2 (i.e. button 4), and there is only one common transformation between these lines: the vertical line has been turned on 'on' or 'off'. Therefore, button 4 is a vertical line-to/off button, which means that button 3 (from the previous line) must be on/off the horizontal lines button. Therefore, button 5 can only be used to change (or change) the size of the shapes in the shape (from large to small, or vice versa). We can now summarize the button functions as follows: Button 1 – changes the shapes in the shape (squares to circles and vice versa) Button 3 – turns the horizontal lines on or off Button 5 – changes the size (large or small) of the shapes in the shape. Now we can apply these button functions to our question bar: Button 1 – will change the shape to a circle and a square. Button 3 – adds a horizontal line to all shapes in the shape. Button 5 – changes the shape sizes – the first from large to small and the second from small to large. The correct answer is: Remember: don't waste time practicing abstract or inductive reasoning test question styles that you won't have in your real abstract or inductive abilities test. Free verbal aptitude test. Free deductive reasoning test. Free practice fitness sample examples – IPC's free verbal or deductive reasoning tests are designed to help you understand and practice the types of questions used in the real test you will sit for your potential employer. Unlike testing tailored to the difficulty and complexity required for a particular job, our free abstract test questions are aimed at a general job. Once you have completed each test, you will immediately receive a full test report that includes your total score, a list of correct and incorrect test responses, and detailed explanations of the correct answers to each question. Our Department's paid practice of verbal aptitude tests are job specific, with a pool of more than 1,200 questions for each job category, including detailed answer explanations to ensure you know how to tackle similar test issues in your real test. These are designed to ensure that you are fully equipped to complete your right verbal aptitude test. To take our free verbal aptitude tests, scroll to the bottom of the page. Free Verbal test type 1 – this free verbal reasoning test is an example of verbal test questions that use statements and word association and lists or words as a method to test your verbal reasoning skills. Free Verbal test type 2 – this free verbal reasoning test is an example of verbal testing issues that use written passages to measure your ability to quickly process large amounts of information and reach a correct conclusion in a logical way. The type of verbal reasoning test you will be asked to take depends on the type of job you are applying for. Talk to our psychometric test coach to learn more about this problem. Free example of a verbal fitness test question: Please read the following passage and answer the question at the end of the passage: Dear Employee: You have completed another year with the company and you have continued to do a very good job overall. Your punctuality, professional behavior, and attention to detail all continue to be at a very high level. However, there are a few aspects of your job performance that need to be improved. First, as a regular daily occurrence at practice, you often fail to collect the balls and put them back on their racks in time enough; Our players will have these balls back on the racks as soon as possible so they can continue to practice without delays and without losing their rhythm. Secondly, water should be available to any player at any time, and occasionally, you've been slow to get water to the players as soon as they get off the field. Make sure you have the water ready for a player as soon as necessary. Finally, you should always be available to immediately pick up balls that bounce off the field. Recently, after a player shot an air ball, you didn't pick up the ball until after free throw shooting drills had begun. Please make a point of retrieving balls as soon as possible. Question: The employee has done a great job over the past year in terms of providing water. Based on the passage, this statement is: True False or Can't Say? To answer this we need to read the passage. The second point of the report states that the employee must do a better job in Availability. Therefore, the correct answer is 'False'. Free example of a deductive reasoning test question: What two statements together prove that Tim has a red car? A. Gil likes Tim's car color B. Tim likes fast cars C. Gil has a fast car D. Gil likes only red cars E. Tim's car is not silver To answer this verbal test question, we need to first examine what each statement says. If we take statement A 'Gil likes Tim's car color' and combine it with statement D 'Gil likes only red cars', then they alone prove that Tim has a red car. The logic is that if Gil only likes red cars (D) and he likes Tim's car color (A) then Tim's car should be red. Remember: don't waste time practicing verbal or deductive reasoning test question styles that you won't have in your real aptitude test. Free numerical aptitude test. Free quantitative reasoning test. Free practice aptitude sample examples – IPC's free numerical reasoning tests are designed to help you understand and practice the types of questions used in the real test you will sit for your potential employer. Unlike test questions tailored to the difficulty and complexity required for a particular job, our free numerical abilities test questions are targeted to a general job. Once you have completed each test, you will immediately receive a full test report that includes your total score, a list of correct and incorrect test responses, and detailed explanations of the correct answers to each question. IPC's paid practice numerical aptitude tests are job specific, with more than 1,700 test questions for each job category, including detailed answer explanations to train your brain to quickly identify and apply the right framework for each question in your real test. These are designed to ensure that you are fully equipped to complete your real numerical aptitude test. To take our free numeric aptitude tests, scroll to the bottom of the page. Free numeric test type 1 - this free numeric test is an example of numeric test questions that use numeric data presented in tables and graphs to measure your numerical reasoning skills. Free numeric test type 2 - this free numerical test is an example of numerical test questions that use number sequences and short numeric text to measure your numerical reasoning skills. The type of numerical reasoning test you will be asked to take depends on the psychometric test provider selected and the type of job you are applying for. Talk to our psychometric test coach to learn more about this problem. Free example of a numerical fitness test question: What is the relationship between the differences in actual sales to target sales in Thailand and Italy during the fourth quarter? To answer this test question, we need to review the information in the table. According to the table, Thailand's sales targets for Quarter 550, but actual sales were: 205 + 105 + 260 = 570. This is a difference of 20 (570 - 550). Italy's target was 600 sales, but sales were: 125 + 250 + 240 = 615. The difference here was 15 (615 - 600). Therefore, the ratio between Thailand and Italy between the differences is 20:15 = 4:3. Remember: don't waste time practicing numerical abilities testing question styles that you won't have in your real numerical aptitude test. Free Mechanical aptitude test. Free practice fitness test examples – IPC's free mechanical reasoning tests are designed to help you understand and practice the types of questions used in the real test you will sit for your potential employer. Unlike test questions tailored to the severity and complexity required for a particular job, our free mechanical fitness practice test issues are targeted to a general job. Once you have completed each test, you will immediately receive a full test report that includes your total score, a list of correct and incorrect test responses, and detailed explanations of the correct answers to each question. IPC's paid practice mechanical aptitude tests are job specific, with more than 800 mechanical test questions for each job category, including detailed response explanations. These are designed to ensure that you are fully equipped to complete your real mechanical aptitude test. To take our free mechanical reasoning test, you need to scroll to the bottom of the page. Read more about matching aptitude tests to the job you are applying for in the test information section and the free psychometric guidance. Free Practice Aptitude Tests Below you will be able to practice short free practice aptitude tests. Each practice test will focus on a style of fitness testing issue. We also offer a detailed answer explanation at the end of each practice aptitude test. We would strongly advise that you read the detailed response notices to learn how to answer similar aptitude test questions in your real test. Note: Free aptitude tests found on the internet are never tailored to the specific job you have applied for, but the real tests are. To best prepare your aptitude tests, please take our department's job-tailored preparation packages.
